## ACCREDITED BY:

Earn your **DevOps Foundation** certification with this fully-accredited course from Good e-Learning! A perfect choice for professionals working within IT operations, development, testing, quality assurance (QA) or management and a fantastic first step for aspiring DevOps engineers.

### WHO IS THIS COURSE AIMED AT?

- Businesses and other organizations wishing to adopt the DevOps methodology
- IT staff seeking to become part of DevOps teams or projects
- IT managers and senior staff who wish to become certified in a world-class and highly recognized methodology
- Experienced and prospective DevOps practitioners who wish to prove their knowledge by gaining an industry recognized certification

### WHAT WILL YOU LEARN?

- The benefits of DevOps for the management of IT development and operations
- How to apply DevOps to real world-organizations, regardless of their size, location, sector, or industry
- How DevOps can lead to higher-quality and more regularly-released code, products, and services
- How DevOps tools can be used to create automated processes, resulting in lower costs and increased reliability
- Everything needed to pass the official DevOps Foundation exam

### WHY TAKE THIS COURSE?

- DevOps is used to drive efficiency and reliability in businesses all over the world
- Team members who share knowledge from different departments can create DevOps cultures of continuous improvement
- DevOps can help you release code, products, and services much faster than your competitors
- This course was built with help from highly experienced DevOps practitioners

### ACCREDITATION

This course has been fully accredited by the **DevOps Institute**.

### IS THERE AN EXAM?

There is an open-book, multiple-choice exam with 40 questions and a duration of 60 minutes. The pass mark is 65%.

The test can be taken online at any time via Kryterion. Candidates will require a webcam and microphone.
