The **PRINCE2 Agile** methodology provides the flexibility to meet any new requirements or unexpected circumstances with timely and effective solutions. An approach combining PRINCE2 and Agile has exploded in popularity, both with programme managers and those supporting programme-driven teams.

👥 WHO IS THIS COURSE AIMED AT?

This PRINCE2 Agile Practitioner course is ideal for students who have already achieved a PRINCE2 Agile Foundation certification.

Building on the theory covered in earlier modules, students will learn to apply their knowledge in practice, allowing them to make major contributions to programme management within their own organizations.

🎓 WHAT WILL YOU LEARN?

This course builds on PRINCE2 Agile Foundation, showing students the reasoning behind combining the two frameworks, as well as how to apply them practically. This ensures that PRINCE2 and Agile can be used without conflict, allowing students to get the best from both frameworks.

At the end of the course, students will be confident not only in using PRINCE2 and Agile, but also in adapting them for individual programmes.

Students who complete this course will learn:

- How to apply the PRINCE2 project management methodology and Agile ways of working

- The purpose and advantages of combining PRINCE2 and Agile

- How to tailor each framework for individual programmes

- How to adjust elements of PRINCE2 Agile to enable better project outcomes

- Everything needed to pass the official PRINCE2 Agile Practitioner exam
