Introduction: The Domain of Business & Digital Transformation

Transformation initiatives are all about making changes to the way a business operates. Digital Transformation involves integrating new digital services with different areas of a business, scaling up an organization's digital infrastructure, digitizing a business offering, or anything else relating to digital and IT management.

|------------------|---------------------------|--------------------|-------------------------|
| Business Analyst | Chief Information Officer | Project Manager | Service Manager |
| Change Manager | Enterprise Architect | Business Architect | Chief Executive Manager |

What are the Business Benefits?

- **Speed** - Having clear practices in place for planning, implementing, and managing transformation initiatives leads to faster and more efficient results
- **Consolidation** - Consolidate separate processes and resources under a single umbrella
- **Collaboration** - Digital Transformation frameworks help users predict and prepare for challenges, turn resistors into collaborators, and bring about superior results
- **Competitiveness** - Recognize and take advantage of opportunities for change
- **Initiative** - Adapt to unforeseen challenges and seize the initiative from slower competitors
