

TOGAF® Enterprise Architecture: Foundation

Framework:
TOGAF

Course Level:
Foundation

Certification Provider:
The Open Group

Exam Provider
The Opne Group

Duration:
10+ hours

Access period:
6 months

Key Information

Learning Code:
LP-GEL-TOGAF-EA-FND

Free Trial Learning Plan Code:

What's included:

- Exam vouchers included
- Tutor Support
- Quizzes and exam practice
- Downloads
- Works on mobile devices
- Extensions available

Course Overview

The TOGAF® Standard is a framework for Enterprise Architecture. It may be used freely for non-commercial use by any organization wishing to develop an Enterprise Architecture for use within that organization.

The TOGAF Enterprise Architecture Foundation course provides the basic knowledge and understanding of Enterprise Architecture using the TOGAF approach, sufficient to be able to contribute to an architecture project or work with the results.

Who is the course aimed at?

This course is aimed at anyone looking for an introduction to the TOGAF® Standard, 10th edition or the new TOGAF Enterprise Architecture certification scheme.

It'll also benefit professionals working in architectural roles who want to achieve a globally recognized qualification and enterprise architects looking to contribute to or lead a team engaged in Enterprise Architecture activities.

What will you learn by taking this course?

The TOGAF® Enterprise Architecture Foundation course covers the concepts of Enterprise Architecture and the TOGAF Standard, the key terminology of the TOGAF Standard, the Architecture Development Method (ADM) cycle and the objectives of each phase, and how to adapt and scope the ADM for use.

It also covers the techniques available to support application of the ADM, applying the ADM, including use of iteration, partitioning and application in a Digital enterprise, how Architecture Governance contributes to architecture development and architecture content – the outputs produced while executing the ADM.

Why should you take this course?

The course is self-paced, so students can structure learning around their own schedules

Content is divided into easily digestible videos

Consistent review of topics covered in Comprehension Check questions

Two practice exams and regular knowledge checks help students prepare for the certification exam

Successful students will be able to demonstrate their understanding of the core TOGAF Enterprise Architecture principles and concepts.

This will help them contribute to and support EA teams

Passing the Foundation (Part 1) exam allows students to move on to the Practitioner (Part 2) examination

This TOGAF Enterprise Architecture Foundation course is accredited by [The Open Group](#)

Syllabus Information

Module 0: Welcome to TOGAF Enterprise Architecture Foundation

Module zero introduces you to the course main features, learning plan, aims and objectives, and structure. It also offers a course guide, diagram packs, a further reading and links document and links to download essential copies of the framework publications.

Module 1: Concepts

Module one answers several fundamental questions, such as “What is an enterprise?”, “Why is an Enterprise Architecture needed?” and “Why use the TOGAF Standard as a framework for Enterprise Architecture?”

The module also introduces the core concepts of the TOGAF Standard, including an initial outline of the Architecture Development Method (ADM), the Enterprise Continuum, Architecture Repository, Content Framework, Enterprise Metamodel and Enterprise Capability.

Module 2: Introduction to the ADM

Module two explains the basic structure of the ADM and explores the governance and scoping of Enterprise Architecture.

Module 3: Phases of the ADM Learning Objectives

Module 3 outlines the purpose and objectives of each of the phases of the ADM: the Preliminary Phase and Phases A-H. It also explains Requirements Management and architecture in an Agile Enterprise.

Module 4: Introduction to ADM techniques

Module 4 introduces the ADM supporting guidelines and techniques. It outlines the purpose of Architecture Principles and what makes a good Architecture Principle. It goes on to explain business scenarios, interoperability, the Business Transformation Readiness Assessment and risk management.

Module 5: Introduction to applying the ADM

Module 5 explains where to find detailed guidance on applying the TOGAF Standard, how to apply iteration to the ADM, the Architecture Landscape, Architecture Partitioning and the purposes of EA Capability. The module concludes with an explanation of how the TOGAF Standard supports the digital enterprise.

Module 6: Introduction to Architecture Governance

Module 6 explains the concept of Architecture Governance, focusing first on its nature and characteristics. It then describes the role and responsibilities of an Architecture Board along with the role of Architecture Contracts and Architecture Compliance.

Module 7: Architecture content

Module 7 focuses on Architecture content – the outputs produced while executing the ADM. It begins by defining key concepts of Architectural Artifacts, what building blocks are and their use in the ADM. It then describes the TOGAF Standard deliverables created and consumed in different ADM phases.

Module 8: The practice exams

There are two practice exams. One has been provided by The Open Group. The other has been created by Good e-Learning.

Module 9: TOGAF Enterprise Architecture: Foundation wrap-up

Module 9 provides information on booking the exam and other courses of interest.

Exam Information

Prerequisites: None

The TOGAF Enterprise Architecture Foundation exam is multiple-choice.

There are 40 questions in total and candidates have 60 minutes to complete the exam.

The exam is closed book – you cannot make use of any resources or materials during the exam.

The pass mark for the exam is 60%: you must score at least 24 out of 40 questions correctly.

In countries where English is a second language, the time allocated for the exam is extended to 90 minutes.

Candidates for all The Open Group exams must complete at least 80% of their course before requesting their exam voucher.

Accreditation

This Good e-Learning TOGAF® Enterprise Architecture Foundation course is accredited by The Open Group.
