What's included:

- ▷ Exam vouchers included
- ▷ Downloads
- ▷ Tutor Support
- ▷ Works on mobile devices
- ▷ Quizzes and exam practice
- ▷ Extensions available

Course Overview

The TOGAF Enterprise Architecture Practitioner course validates a person's knowledge, comprehension, and ability to apply the TOGAF Standard, 10th Edition.

After completion, the learner will be confident in developing, sustaining, and using an Enterprise Architecture.

Individuals who complete the course will gain knowledge on how to use the TOGAF approach. This includes being able to transform and manage change, use the TOGAF method, and apply TOGAF techniques.

Who is the course aimed at?

This course is aimed at anyone looking to demonstrate their ability to apply the TOGAF® Standard, 10th edition.

It's particularly relevant to individuals expected to apply the TOGAF approach to develop, sustain, and transform domain architectures or those actively contributing to organizational transformation.

The TOGAF® Enterprise Architecture Practitioner course will also benefit individuals working in Agile environments who need to understand and apply Enterprise Architecture using the TOGAF Standard.

What will you learn by taking this course?

Candidates achieving TOGAF® Enterprise Architecture Practitioner certification will be able to demonstrate their ability to apply the TOGAF approach to transform and manage change, the TOGAF method to a variety of transformation efforts in an organization and TOGAF techniques to current and future architecture projects.

Why should you take this course?

- This is a self-paced course, allowing students to structure learning around their own schedules.
- Content is divided into easily digestible videos.
- Consistent review of topics covered in Comprehension Check questions.
- A practice exam and regular knowledge checks help students prepare for the certification exam.
- The TOGAF Enterprise Architecture Learning Studies enables candidates to show they can use the TOGAF Standard in different organizational scenarios.
- Successful completion of the TOGAF Learning Studies allows candidates to obtain The Open Group Applied Enterprise Architecture Practitioner badge.
- Successful students can demonstrate their understanding of the core TOGAF Enterprise Architecture principles and concepts. This will help them contribute to EA teams.
- This TOGAF Enterprise Architecture Practitioner course is accredited by The Open Group.

Syllabus Information

Module 0: Welcome to TOGAF Enterprise Architecture: Practitioner

Module 0 introduces you to the main features of the course, including:
learning plan
aims and objectives
structure

Module 1: The context of Enterprise Architecture

Module 1 defines what Enterprise Architecture is and looks at Architecture Governance and Architecture Security. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 2: Enterprise Architecture in digital contexts

Module 2 looks at how Agile development and digital business is managed in TOGAF and iteration in the TOGAF method. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 3: Phase A – The starting point and stakeholder management

Module 3 looks at Phase A of the ADM and how stakeholders are managed during Architecture work. It explores key aspects of phase A, Architecture views and viewpoints and alternatives and trade-offs. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 4: Architecture development

Module 4 explores Phases B, C and D of the ADM. It looks at the inputs, outputs, steps and approach for each phase. It also explores security concerns related to each phase. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 5: Implementing the Architecture

Module 5 explores Phases E, F and G of the ADM. It looks at the inputs, outputs, steps and approach for each phase. It also explores security concerns related to each phase. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 6: Architecture Change Management and Requirements Management

Module 6 looks at how Change is Managed in Phase H of the ADM. It also covers how requirements are managed throughout the ADM in the Requirements Management Phase. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 7: Supporting the ADM work Learning Objectives

Module 7 looks at key concepts that support the ADM. These include Business Scenarios, Migration Planning Techniques, Compliance reviews and the Architecture Landscape.

Module 8: The Architecture Repository and Enterprise Metamodel

Module 8 explores the Architecture Repository and the Enterprise Metamodel, which is used to organize Architecture content. The module includes a scenario, where individuals can demonstrate application of their knowledge.

Module 9: Application and Exam Preparation

Module 9 contains a series of exam preparation exercises based on real-world scenarios and a timed practice exam.

Module 10: TOGAF Enterprise Architecture: Practitioner wrap up

Module 10 provides information on booking the exam and other courses of interest.

Exam Information

Prerequisites: TOGAF®
Enterprise Architecture Foundation

- The TOGAF Enterprise Architecture Practitioner exam is multiple-choice
- There are 8 scenario-based questions in total
- Each question is worth between 0 and 5 marks
- Candidates have 90 minutes to complete the exam
- The exam is open book, so you can use certain resources or materials during the exam
- The pass mark is 60%. You must score at least 24 out of a total of 40 points to pass
- Candidates for all The Open Group exams must complete at least 80% of their course before requesting their exam voucher.

Accreditation

This Good e-Learning TOGAF® Enterprise Architecture Practitioner course is accredited by The Open Group.
